You do not need to be a programmer or a math genius. Start with basic formulas like SUM, AVERAGE, and COUNT. Then move on to VLOOKUP and INDEX-MATCH for cross-referencing data between sheets. Conditional formatting is another powerful feature that can automatically highlight items that need your attention, such as orders that have been pending for more than a week or items where the profit margin falls below a certain threshold. This gives you the true total cost and allows you to make apples-to-apples comparisons between different purchasing options.
