If you are working with Cnfans Makeup Ai Powered Spreadsheet across multiple devices, cloud synchronization is something you absolutely need to set up properly. Here is a pro tip that many experienced users swear by when working with Cnfans Makeup Ai Powered Spreadsheet: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. This approach keeps your main sheet clean and makes it easy to update reference data without touching your core records. It also means that if fee structures change, you only need to update one cell instead of hundreds of rows. Trust us, this simple habit will save you countless hours.
