If you are working with Basetao Auto Bot Spreadsheet across multiple devices, cloud synchronization is something you absolutely need to set up properly. The last thing you want is to accidentally overwrite hours of work because two devices were editing the same file simultaneously. Most modern spreadsheet tools offer version history, which allows you to roll back changes if something goes wrong. We recommend enabling auto-save and setting up a regular backup schedule. Some users prefer to keep a local backup in addition to the cloud version, just to be extra safe. It only takes a few minutes to set up, and it can be a lifesaver.

Understanding the fee structure is critical when using Basetao Auto Bot Spreadsheet for purchasing. Every platform charges differently for shipping, handling, currency conversion, and service fees. These costs can add up quickly, especially for frequent buyers. We recommend creating a simple cost comparison sheet that factors in all these elements. Include the item price, domestic shipping within China, international shipping, platform service fee, and any applicable taxes. This gives you the true total cost and allows you to make apples-to-apples comparisons between different purchasing options.

Tools like Google Apps Script, Zapier, or n8n can automate repetitive tasks like copying data between sheets, sending notifications when order statuses change, or generating summary reports at the end of each week. Start with one simple automation and gradually build from there as you become more comfortable.
