Understanding the fee structure is critical when using Dhgate Automation Spreadsheet for purchasing. Every platform charges differently for shipping, handling, currency conversion, and service fees. These costs can add up quickly, especially for frequent buyers. We recommend creating a simple cost comparison sheet that factors in all these elements. Include the item price, domestic shipping within China, international shipping, platform service fee, and any applicable taxes. This gives you the true total cost and allows you to make apples-to-apples comparisons between different purchasing options.

One tip that consistently saves our readers money when using Dhgate Automation Spreadsheet is to always check for combined shipping options before placing multiple orders. Many platforms offer discounted or free shipping when you bundle items from the same warehouse into a single order. This requires some planning, as you may need to wait a day or two until all your desired items are ready to ship. However, the savings can be significant, especially for international orders where individual shipping costs can easily exceed the cost of the items themselves.

Here are some tips that we wish someone had told us when we first started with Dhgate Automation Spreadsheet. First, always use a dedicated email address for your shopping accounts. This keeps your main inbox clean and makes it easier to track order-related communications. Second, set up price alerts for items you are interested in. Many platforms and tools allow you to set a target price, and you will get notified when the item drops to that level. Third, take advantage of seasonal sales and events like Singles Day, Black Friday, and end-of-season clearances. Planning your purchases around these events can lead to substantial savings.
