

Freightos Spreadsheet Automation - Complete Guide (2026)

Category: Automation & Bots | Updated: 2026-04-03

Every day, thousands of people search for Freightos Spreadsheet Automation, but very few find the kind of detailed, no-nonsense information they actually need. Whether you are trying to save money on international shipping, track your orders more efficiently, or simply avoid common pitfalls, this guide has you covered. We have organized the content into clear sections so you can easily jump to whatever topic matters most to you. Feel free to bookmark this page and come back whenever you need a reference.

Getting started with Freightos Spreadsheet Automation is easier than most people think, but there are a few things you should set up correctly from the beginning to avoid headaches later. First, make sure you have a clear understanding of your goals. Are you trying to track expenses, manage inventory, compare prices, or automate repetitive tasks? Once you know your primary objective, you can customize the spreadsheet to match your workflow. Most platforms allow you to import templates, which saves a tremendous amount of time. Look for templates that have been tested by real users rather than generic ones that look pretty but lack functionality.

Understanding the fee structure is critical when using Freightos Spreadsheet Automation for purchasing. Every platform charges differently for shipping, handling, currency conversion, and service fees. These costs can add up quickly, especially for frequent buyers. We recommend creating a simple cost comparison sheet that factors in all these elements. Include the item price, domestic shipping within China, international shipping, platform service fee, and any applicable taxes. This gives you the true total cost and allows you to make apples-to-apples comparisons between different purchasing options.

One tip that consistently saves our readers money when using Freightos Spreadsheet Automation is to always check for combined shipping options before placing multiple orders. Many platforms offer discounted or free shipping when you bundle items from the same warehouse into a single order. This requires some planning, as you may need to wait a day or two until all your desired items are ready to ship. However, the savings can be significant, especially for international orders where individual shipping costs can easily exceed the cost of the items themselves.

One of the most common mistakes people make when setting up Freightos Spreadsheet Automation is skipping the configuration step. It might be tempting to jump straight into adding data, but taking ten minutes to configure your columns, formulas, and formatting rules will save you hours down the road. Start by defining your column headers clearly. For example, if you are tracking orders, you will want columns for order number, date, item name, quantity, unit price, shipping cost, total cost, tracking number, and status. Use data validation to create dropdown menus for fields like status and payment method. This prevents typos and makes filtering much easier.

Whether you are just getting started or looking to optimize your existing workflow, the key takeaway from this guide is that knowledge is your most valuable asset when it comes to Freightos Spreadsheet Automation. The difference between a frustrating experience and a smooth one often comes down to understanding a few critical details. We have covered those details here, and we hope you will put them to good use. Remember, the community is always here to help, so do not hesitate to ask questions and share your own discoveries.
