You do not need to be a programmer or a math genius. Start with basic formulas like SUM, AVERAGE, and COUNT. Then move on to VLOOKUP and INDEX-MATCH for cross-referencing data between sheets. Conditional formatting is another powerful feature that can automatically highlight items that need your attention, such as orders that have been pending for more than a week or items where the profit margin falls below a certain threshold. These small improvements compound over time and can significantly boost your productivity.

Shipping insurance is something that many buyers overlook when using Lightinthebox Complete Guide What You Need To Know, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. Start with one simple automation and gradually build from there as you become more comfortable.
