A common question we get asked about Yoybuy Spreadsheet Inventory Tracking is whether it is better to buy in bulk or stick to individual orders. The answer depends on several factors, including the type of product, the shipping method, and your storage capacity. For lightweight items like phone cases and accessories, bulk ordering usually results in lower per-unit shipping costs. However, for heavier items like electronics or furniture, the savings from bulk ordering may be offset by increased shipping weight. Our advice is to start with a small test order to evaluate product quality before committing to a larger purchase.

One tip that consistently saves our readers money when using Yoybuy Spreadsheet Inventory Tracking is to always check for combined shipping options before placing multiple orders. Many platforms offer discounted or free shipping when you bundle items from the same warehouse into a single order. This requires some planning, as you may need to wait a day or two until all your desired items are ready to ship. However, the savings can be significant, especially for international orders where individual shipping costs can easily exceed the cost of the items themselves.
