Here is a pro tip that many experienced users swear by when working with Is Pqbuy Warning: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. This approach keeps your main sheet clean and makes it easy to update reference data without touching your core records. It also means that if fee structures change, you only need to update one cell instead of hundreds of rows. Trust us, this simple habit will save you countless hours.

Shipping insurance is something that many buyers overlook when using Is Pqbuy Warning, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.

Many platforms offer discounted or free shipping when you bundle items from the same warehouse into a single order. This requires some planning, as you may need to wait a day or two until all your desired items are ready to ship. However, the savings can be significant, especially for international orders where individual shipping costs can easily exceed the cost of the items themselves.
