

Freightos Scam Alert Spreadsheet - Complete Guide (2026)

Category: Scam Alert & Safety | Updated: 2026-04-03

Every day, thousands of people search for Freightos Scam Alert Spreadsheet, but very few find the kind of detailed, no-nonsense information they actually need. Whether you are trying to save money on international shipping, track your orders more efficiently, or simply avoid common pitfalls, this guide has you covered. We have organized the content into clear sections so you can easily jump to whatever topic matters most to you. Feel free to bookmark this page and come back whenever you need a reference.

Here is a pro tip that many experienced users swear by when working with Freightos Scam Alert Spreadsheet: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. This approach keeps your main sheet clean and makes it easy to update reference data without touching your core records. It also means that if fee structures change, you only need to update one cell instead of hundreds of rows. Trust us, this simple habit will save you countless hours.

For those who want to get the most out of Freightos Scam Alert Spreadsheet, learning a few key formulas can make a massive difference. You do not need to be a programmer or a math genius. Start with basic formulas like SUM, AVERAGE, and COUNT. Then move on to VLOOKUP and INDEX-MATCH for cross-referencing data between sheets. Conditional formatting is another powerful feature that can automatically highlight items that need your attention, such as orders that have been pending for more than a week or items where the profit margin falls below a certain threshold. These small improvements compound over time and can significantly boost your productivity.

Shipping insurance is something that many buyers overlook when using Freightos Scam Alert Spreadsheet, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.

A common pitfall that catches many Freightos Scam Alert Spreadsheet users off guard is currency conversion fees. Many platforms display prices in USD or EUR but process payments in a different currency. This can result in unfavorable exchange rates and hidden fees that are not immediately visible. We recommend using a currency conversion tool or a fee-free debit card like Wise to make international payments. This gives you the real exchange rate and can save you 3-5% on each transaction compared to using a standard credit card.

We recommend using a currency conversion tool or a fee-free debit card like Wise to make international payments. This gives you the real exchange rate and can save you 3-5% on each transaction compared to using a standard credit card.

According to recent reports from online security researchers, scam attempts related to shopping agent platforms have increased by over 40% in the past year. The most common vectors include fake login pages, fraudulent tracking numbers, and social engineering attacks through WhatsApp and Telegram. If you are using any platform related to Freightos Scam Alert Spreadsheet, make sure you have enabled two-factor authentication and never share your verification codes with anyone. These simple precautions can prevent the vast majority of account takeover attempts.

One of the less obvious but equally damaging scams involves spreadsheet templates for Freightos Scam Alert Spreadsheet that contain hidden macros or formulas designed to send your data to a third party. Before downloading any template from an untrusted source, scan it with antivirus software and check the formulas for any suspicious external links. Stick to templates from reputable sources and always review the code if you have the technical skills. If a template asks for permissions that seem unnecessary, such as access to your email or contacts, that is a major red flag.
