One of the most common mistakes people make when setting up Litbuy Got Scammed Spreadsheet is skipping the configuration step. It might be tempting to jump straight into adding data, but taking ten minutes to configure your columns, formulas, and formatting rules will save you hours down the road. Start by defining your column headers clearly. For example, if you are tracking orders, you will want columns for order number, date, item name, quantity, unit price, shipping cost, total cost, tracking number, and status. Use data validation to create dropdown menus for fields like status and payment method. This prevents typos and makes filtering much easier.

If you are working with Litbuy Got Scammed Spreadsheet across multiple devices, cloud synchronization is something you absolutely need to set up properly. The last thing you want is to accidentally overwrite hours of work because two devices were editing the same file simultaneously. Most modern spreadsheet tools offer version history, which allows you to roll back changes if something goes wrong. We recommend enabling auto-save and setting up a regular backup schedule. Some users prefer to keep a local backup in addition to the cloud version, just to be extra safe. It only takes a few minutes to set up, and it can be a lifesaver.

Shipping insurance is something that many buyers overlook when using Litbuy Got Scammed Spreadsheet, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.
