One of the most common mistakes people make when setting up Is Hagobuy Never Arrived is skipping the configuration step. It might be tempting to jump straight into adding data, but taking ten minutes to configure your columns, formulas, and formatting rules will save you hours down the road. Start by defining your column headers clearly. For example, if you are tracking orders, you will want columns for order number, date, item name, quantity, unit price, shipping cost, total cost, tracking number, and status. Use data validation to create dropdown menus for fields like status and payment method. This prevents typos and makes filtering much easier.

Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered.
