Here is a pro tip that many experienced users swear by when working with Freightos Is It Real Reddit: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. Start with basic formulas like SUM, AVERAGE, and COUNT. Then move on to VLOOKUP and INDEX-MATCH for cross-referencing data between sheets. Conditional formatting is another powerful feature that can automatically highlight items that need your attention, such as orders that have been pending for more than a week or items where the profit margin falls below a certain threshold.
