Before we dive into the details, let us address the elephant in the room: yes, there is a lot of misinformation out there about Freightos Spreadsheet 2026. We have seen articles that contradict each other, forum posts that spread outdated advice, and YouTube videos that prioritize entertainment over accuracy. Our goal with this guide is to cut through all that noise and give you information you can actually trust. We update this content regularly, so you can be confident that what you are reading reflects the current state of things.

Here is a pro tip that many experienced users swear by when working with Freightos Spreadsheet 2026: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. This approach keeps your main sheet clean and makes it easy to update reference data without touching your core records. It also means that if fee structures change, you only need to update one cell instead of hundreds of rows. Trust us, this simple habit will save you countless hours.

Shipping insurance is something that many buyers overlook when using Freightos Spreadsheet 2026, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.

Here are some tips that we wish someone had told us when we first started with Freightos Spreadsheet 2026. First, always use a dedicated email address for your shopping accounts. This keeps your main inbox clean and makes it easier to track order-related communications. Second, set up price alerts for items you are interested in. Many platforms and tools allow you to set a target price, and you will get notified when the item drops to that level. Third, take advantage of seasonal sales and events like Singles Day, Black Friday, and end-of-season clearances. Planning your purchases around these events can lead to substantial savings.
