Getting started with Freightos Spreadsheet For Procurement is easier than most people think, but there are a few things you should set up correctly from the beginning to avoid headaches later. First, make sure you have a clear understanding of your goals. Are you trying to track expenses, manage inventory, compare prices, or automate repetitive tasks? Once you know your primary objective, you can customize the spreadsheet to match your workflow. Most platforms allow you to import templates, which saves a tremendous amount of time. Look for templates that have been tested by real users rather than generic ones that look pretty but lack functionality.

Understanding the fee structure is critical when using Freightos Spreadsheet For Procurement for purchasing. Every platform charges differently for shipping, handling, currency conversion, and service fees. These costs can add up quickly, especially for frequent buyers. We recommend creating a simple cost comparison sheet that factors in all these elements. Include the item price, domestic shipping within China, international shipping, platform service fee, and any applicable taxes. This gives you the true total cost and allows you to make apples-to-apples comparisons between different purchasing options.

A common pitfall that catches many Freightos Spreadsheet For Procurement users off guard is currency conversion fees. Many platforms display prices in USD or EUR but process payments in a different currency. This can result in unfavorable exchange rates and hidden fees that are not immediately visible. We recommend using a currency conversion tool or a fee-free debit card like Wise to make international payments. This gives you the real exchange rate and can save you 3-5% on each transaction compared to using a standard credit card.
