

Freightos Spreadsheet Order Management - Complete Guide (2026)

Category: Shipping & Logistics | Updated: 2026-04-03

We know how frustrating it can be to deal with spreadsheet tools and online shopping platforms without proper guidance. That is why we decided to create the most thorough resource possible on Freightos Spreadsheet Order Management. This is not a quick overview or a sales pitch. It is a genuine deep dive into the topic, covering everything from setup and configuration to advanced tips that even seasoned users might not know about. Grab a cup of coffee and settle in, because this is going to be worth your time.

For those who want to get the most out of Freightos Spreadsheet Order Management, learning a few key formulas can make a massive difference. You do not need to be a programmer or a math genius. Start with basic formulas like SUM, AVERAGE, and COUNT. Then move on to VLOOKUP and INDEX-MATCH for cross-referencing data between sheets. Conditional formatting is another powerful feature that can automatically highlight items that need your attention, such as orders that have been pending for more than a week or items where the profit margin falls below a certain threshold. These small improvements compound over time and can significantly boost your productivity.

Here is a pro tip that many experienced users swear by when working with Freightos Spreadsheet Order Management: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. This approach keeps your main sheet clean and makes it easy to update reference data without touching your core records. It also means that if fee structures change, you only need to update one cell instead of hundreds of rows. Trust us, this simple habit will save you countless hours.

Shipping insurance is something that many buyers overlook when using Freightos Spreadsheet Order Management, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.

One tip that consistently saves our readers money when using Freightos Spreadsheet Order Management is to always check for combined shipping options before placing multiple orders. Many platforms offer discounted or free shipping when you bundle items from the same warehouse into a single order. This requires some planning, as you may need to wait a day or two until all your desired items are ready to ship. However, the savings can be significant, especially for international orders where individual shipping costs can easily exceed the cost of the items themselves.

Organization is the secret weapon of successful users of Freightos Spreadsheet Order Management. Develop a consistent naming convention for your orders and tracking entries. For example, use the format YYYY-MM-DD-Platform-ItemName. This makes it easy to sort and search through your records. Use color coding to highlight the status of different orders. For instance, green for delivered, yellow for in transit, red for issues, and gray for returned. These small organizational habits might seem trivial, but they save an enormous amount of time when you are managing dozens or hundreds of orders simultaneously.

Shipping insurance is something that many buyers overlook when using Freightos Spreadsheet Order Management, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or

damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.

To sum up, mastering Freightos Spreadsheet Order Management is not about finding a single magic tool or strategy. It is about building a system that works for your specific needs and consistently refining it over time. The tips, tutorials, and warnings we have shared in this guide are based on real-world experience and community feedback. We encourage you to start small, test what works for you, and gradually expand your approach. If you found this guide helpful, consider sharing it with others who might benefit. And if you have your own tips or experiences, we would love to hear about them in the comments.
