One of the most common mistakes people make when setting up Pandabuy Hidden Fees Spreadsheet is skipping the configuration step. It might be tempting to jump straight into adding data, but taking ten minutes to configure your columns, formulas, and formatting rules will save you hours down the road. Start by defining your column headers clearly. For example, if you are tracking orders, you will want columns for order number, date, item name, quantity, unit price, shipping cost, total cost, tracking number, and status. Use data validation to create dropdown menus for fields like status and payment method. This prevents typos and makes filtering much easier.
