Shipping insurance is something that many buyers overlook when using The Complete Peachbuy Ultimate Guide, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.

Organization is the secret weapon of successful users of The Complete Peachbuy Ultimate Guide. Develop a consistent naming convention for your orders and tracking entries. For example, use the format YYYY-MM-DD-Platform-ItemName. This makes it easy to sort and search through your records. Use color coding to highlight the status of different orders. For instance, green for delivered, yellow for in transit, red for issues, and gray for returned. These small organizational habits might seem trivial, but they save an enormous amount of time when you are managing dozens or hundreds of orders simultaneously.

You do not need to be a developer to set up basic automations. Many platforms offer pre-built templates and tutorials that walk you through the process step by step. Start with one simple automation and gradually build from there as you become more comfortable.
